

Yes that's right. No longer do Elements users need to create complicated work arounds such as using a blank adjustment layer in order to get the use of a simple layer mask. Now you can create a simple layer mask for any image layer just like in Photoshop. This will open up a whole range of great editing and enhancement techniques that have previously been either too complicated or impossible for Elements users to employ.-

All videos are supplied in the Flash video format as a .FLV files. You will need the latest version of Adobe's Flash Player to view the movies. If you don't have it installed you can download it [here](#) from www.adobe.com.
