

PSE.NET Technique Tutorial

Step by Step:

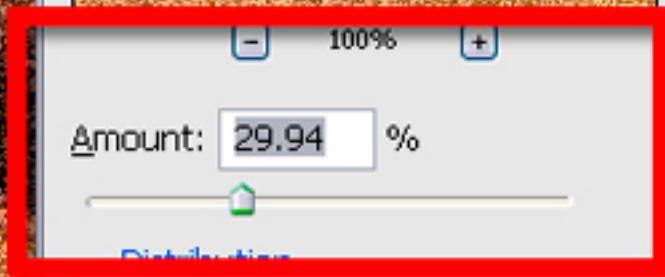

Use these steps to add noise to your photo.

01 Select the Add Noise filter from the Noise section of the Filter menu. Adjust the thumbnail preview to a view of 100% and tick the Preview option. Select Uniform for an even distribution of new pixels across the image, or pick Gaussian for a more speckled effect.

The Monochromatic option restricts the effect to changes in the tone of pixels rather

When you click the [Monochromatic](#) checkbox, the effect only affects the tone of pixels rather than their color. To see the effect, click the [OK](#) button in the dialog box, and then click the [Results](#) button in the [Tools](#) palette.
