PSE.NET Technique Tutorial

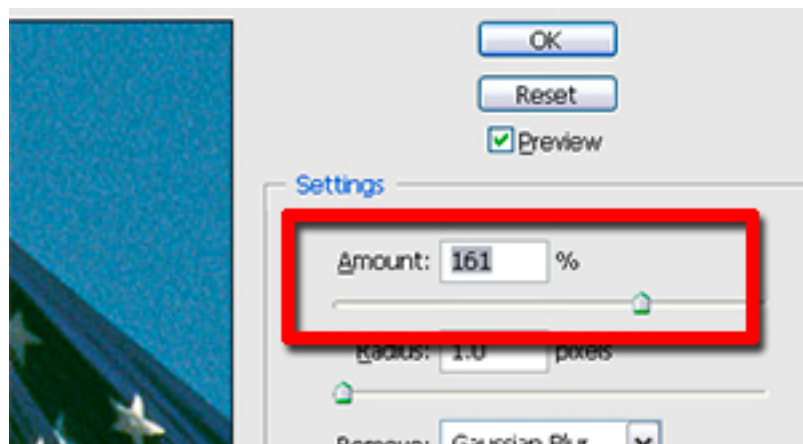

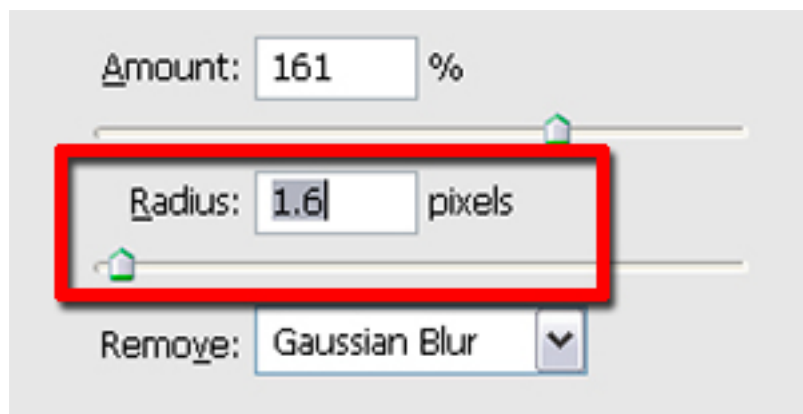

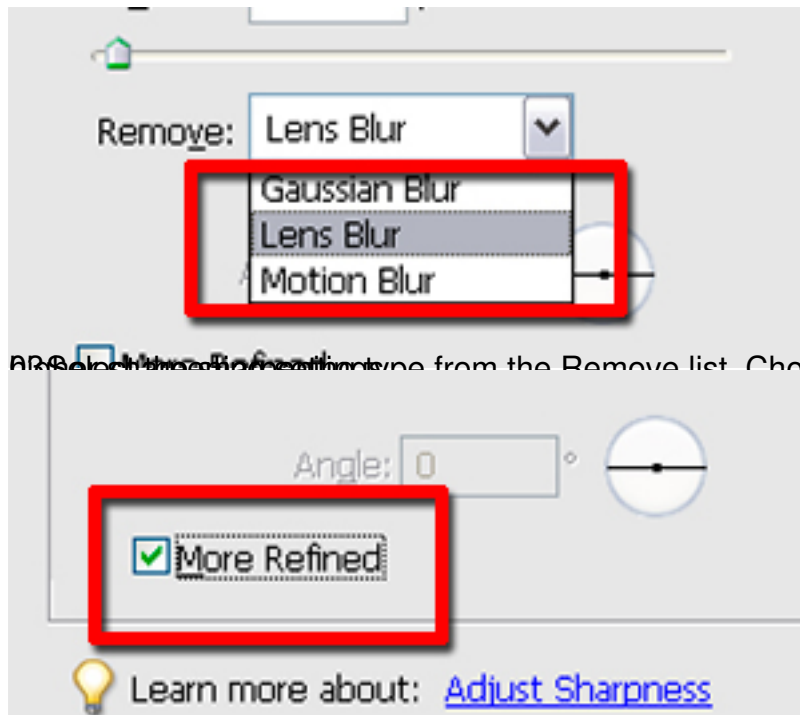

Step by Step:

Use these steps to adjust sharpness.

01 Select Enhance > Adjust Sharpness. Adjust the Amount slider to control the strength of the filter.

02 Adjust the Radius slider to control the number of pixels surrounding an edge that is included in the effect.

Remove: Lens Blur

Gaussian Blur
Lens Blur
Motion Blur

Angle: 0 °

More Refined

Select the blur type from the Remove list. Choose Lens Blur for less halo effects at
