

## PSE.NET Technique Tutorial

By editing the layer mask you can change how adjustment layers merge with the image layer beneath. **Step by Step:**

Use these steps to edit the layer mask to change how adjustment layers merge with the image layer beneath.

01 Change how adjustment layers merge with the image layer beneath by editing the layer mask. Start by creating a fill layer such as Pattern to the image. Then check to see that the default colors (white and black) are selected for the Elements foreground and background colors.

If the mask is selected in the layers palette, the default colors will change to black and white by themselves.
