

PSE.NET Technique Tutorial

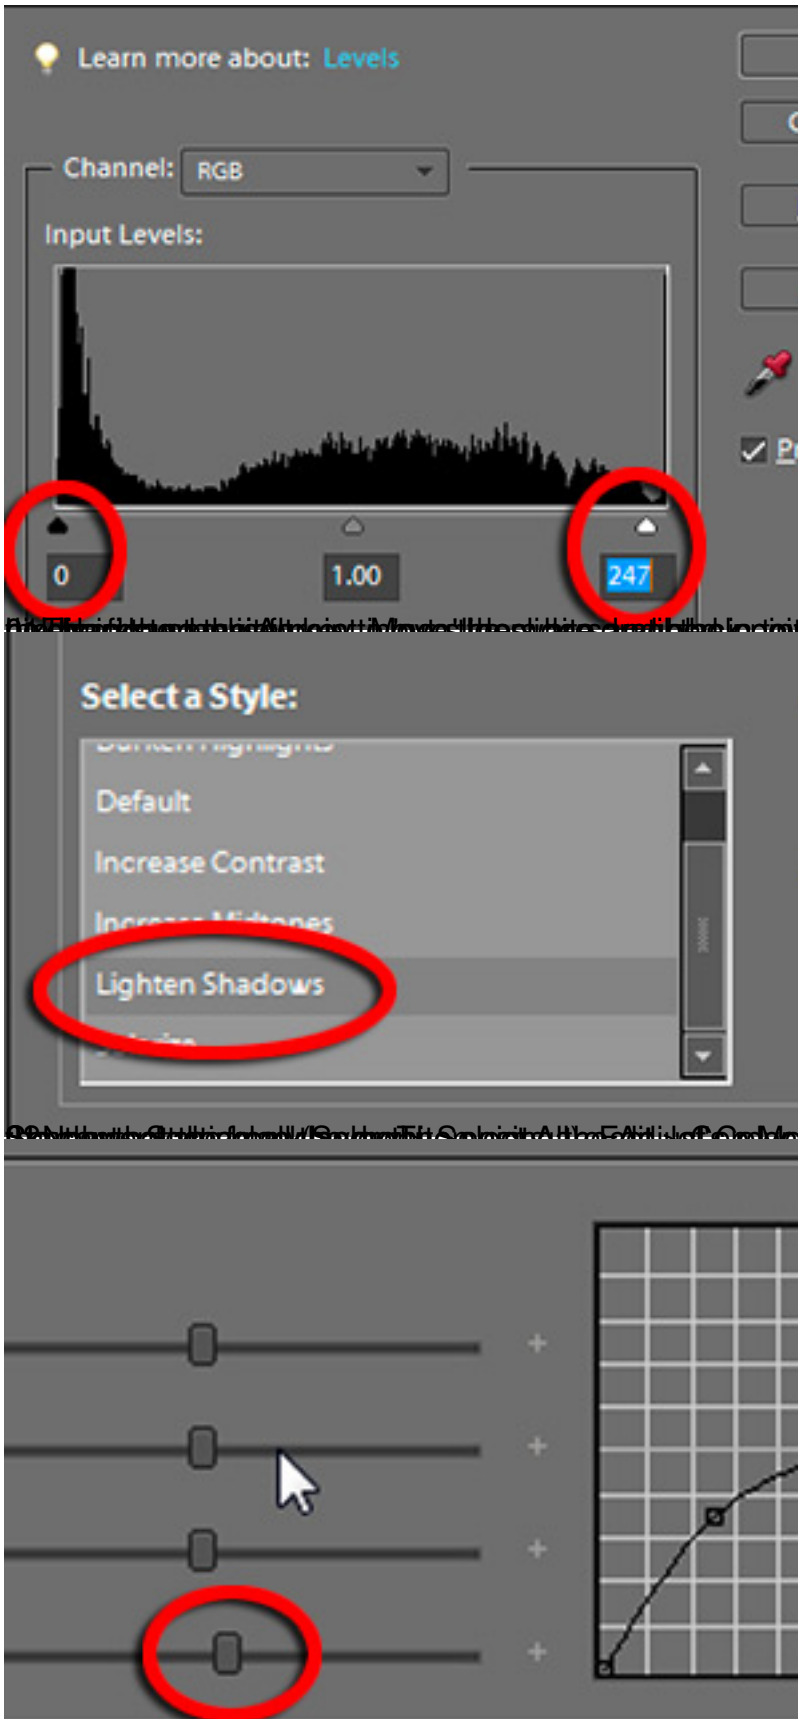

Step by Step:

Use these steps to increase the shadow detail in your old photos.

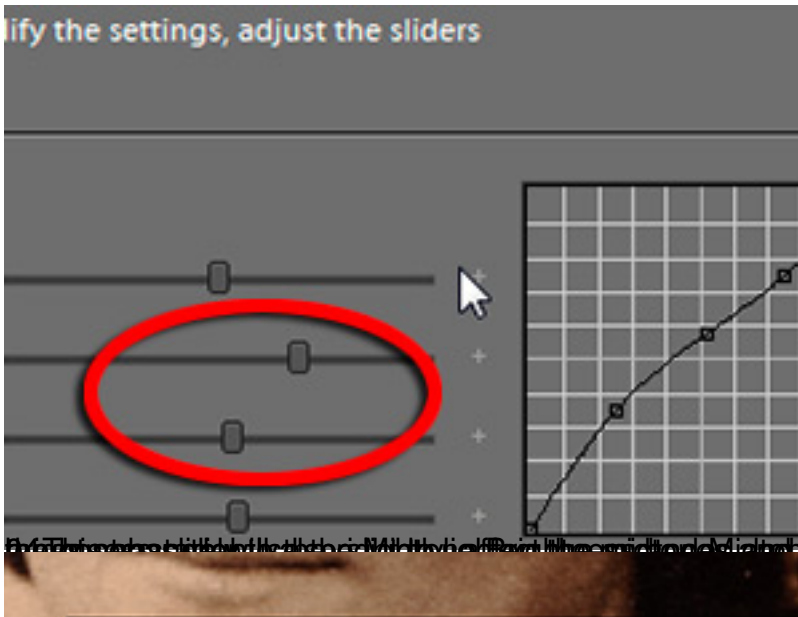

Adjusting shadow tones

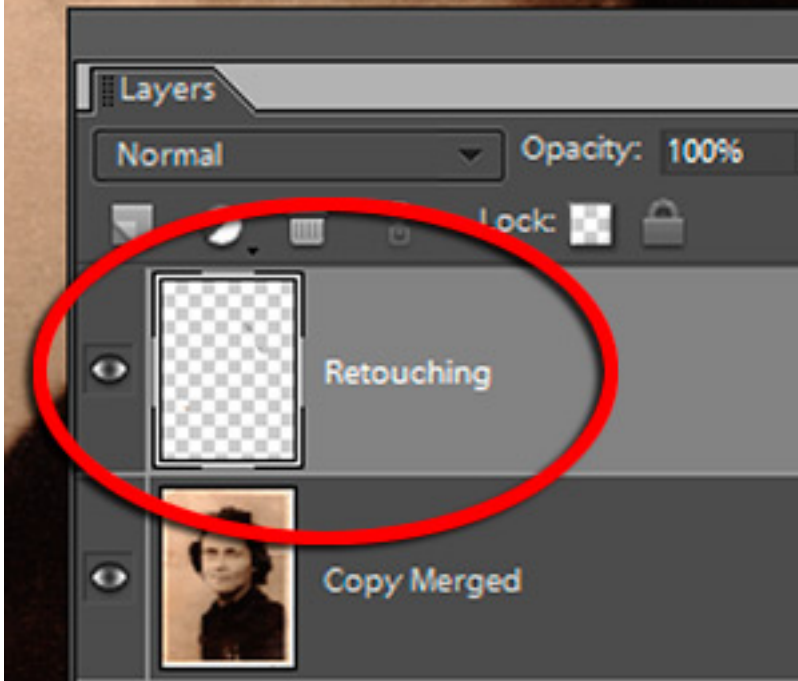

Adjusting the Levels panel's sliders while

is selected (Editing Panel).

Adjusting the Shadows slider to the right first will do this with the shadow contrast and

By clicking on the slider, you can adjust the shadows. The graph to the right shows the curve being adjusted.

After adjusting the shadows, you can click on the 'Retouching' layer to see the results. The 'Copy Merged' layer is also visible.
